

New CEO and COO for Dynamic Hearing Pty. Ltd.

Dynamic Hearing announces new appointments

January 30th 2009. Dynamic Hearing, the leading independent developer of DSP solutions for personal communication devices, announced today that Anthony Shilton has been appointed Chief Executive Officer; replacing Dr. Elaine Saunders who has accepted a new role at Monash University. Anthony was previously Dynamic Hearing's Chief Operation Officer.

Anthony joined Dynamic Hearing in 2003 and managed technology transfer and product development activities. Prior to this he spent six years at Ericsson, both in management and the hands-on development of hardware and software products. It was at Ericsson where Anthony built his reputation as a talented leader and manager. In the role of COO at Dynamic Hearing he has worked closely with customers and strategic partners to develop the company's excellent reputation for quality and timely delivery of innovative technology.

"I look forward to leading Dynamic Hearing through its next stage of growth", says Anthony. "In the time that I have been with the company, we have introduced multiple new products to the hearing aid market, entered the Bluetooth headset market and continue to make year on year increases in revenue and unit volumes. We have many exciting opportunities ahead of us."

Elaine Saunders says, "I have decided that the time is right for Dynamic Hearing to have a new leader, and for me to seek new challenges. I have full confidence in Anthony and the management team (Chief Financial Officer – Ian Mott, Chief Technology Officer – Bonar Dickson, Chief Engineer – Brenton Steele, and Marketing Manager – Hayley Fiket) to continue delivering high quality software and services to our customers."

New recruit Tom Harvey replaces Anthony in the role of Chief Operations Officer. Tom has a proven track-record of delivering innovative human interface technology to the mobile consumer electronics market. Prior to joining Dynamic Hearing, Tom was Director of Engineering at Synaptics Inc. where he led the development of new generation touch input solutions that have changed the way users interact with mobile phones, media players, notebooks, and other portable devices. Tom has developed a strong reputation for collaborating with customers and partners internationally and has successfully built new product development and customer support organizations throughout Asia, Europe and the USA.
